

Ruling out alpha-1 is as easy as:

1

Look beyond smoking and rule out alpha-1 by screening all patients with COPD

2

Use the fast, easy, and completely FREE AlphaID kit and swab the inside of the cheek

3

Mail the sample to the lab using the prepaid shipping label

Talk to your patients about screening for alpha-1 today.

alpha-1, alpha₁-antitrypsin deficiency; COPD, chronic obstructive pulmonary disease.
