Conference overview

This three-day course will be an extensive review of multiple systems in anatomic pathology that will allow anatomic pathologists to become more proficient in different fields of pathology. This seminar will have truly incredible speakers who have delivered excellent sessions in various fields in pathology nationally and internationally. Not only do they have expertise in their subspecialties, but they deliver their material in a clear and concise way. This seminar is intended primarily for practicing pathologists, fellows, residents, and other health care professionals.
